TODAY & TOMORROW

SEPTEMBER 15-28, 1984

ADDRESS CORRECTION REQUESTED **RUSH — TIME DATED**

(Newsbriefs continued)

Langley Porter Psychiatric Institute has programs to help individuals stop smoking and to study the effects of nicotine.
• Many people continue to smoke because they believe they will gain weight if they stop. UCSF's Habit Abatement Clinic has added a new study to the stop smoking program to help people prevent weight gain while they quit smoking.

Participants will be given instructions on how to record how much they eat, and they will wear an activity monitor periodically during the study.

The Habit Abatement Clinic accepts participants between the ages of 18 and 60 who are not pregnant, do not have heart or lung disease, diabetes, or high blood pressure, and are not on special diets. The clinic will have day and evening sessions at LPPI. For further information call x77-453.

• Does your teenager smoke? The LPPI Drug Dependence Lab is conducting a study on the nicotine effects in adolescent smokers between the ages of 12 and 17. Blood samples and physiological tests will be taken. Subjects will be paid $5 per hour. Potential subjects must have the consent of parent or guardian. For further information call x77-475 weekdays between 2 and 4 p.m.

Whether a sometime scuba diver, frustrated fossil finder, or armchair archeologist, you can share in the excitement of scientific discovery as a member of a UC-Berkeley research expedition this winter.

You don't have to be a scientist to join. Your curiosity and willingness to share the costs and challenges of field work are the main qualifications. Expeditions this winter include tropical bees of Lomas Barbudal (Costa Rica), Viscachas of the Patagonian Desert (Argentina) and Impact of Modernization on a Sherpa Community (Nepal).

For further information call 642-6586 or write University Research Expeditions Program, University of California, Berkeley, CA 94720.

WEDNESDAY 26

UROLOGY GRAND ROUNDS. SFGH Cafeteria. 7:30 a.m.

THURSDAY 27

NEUROLOGY-NEUROSURGERY CONFERENCE. Rm. 4H2. 8 a.m.

TRAUMA CENTER CONFERENCE: *Resuscitation.* Donald Trunkey, Surg., SFGH. Rm. 4H40. 8:30 a.m.

NORTHERN CALIFORNIA OCCUPATIONAL HEALTH CENTER CONFERENCE: *Nutritional Causes of Cancer.* Marion Nestle, Schl. Med. & Human Bio. Prog. Carr Aud. 8:30-10 a.m.

FAMILY PRACTICE GRAND ROUNDS: *Physical & Psychological Aspects of Rehabilitation After Myocardial Infarction.* Robert DeBusk, Cardiac Rehab. Prog., Stanford. Carr Aud. 12:30-1:30 p.m.

FRIDAY 28

MAXILLOFACIAL TRAUMA CONFERENCE. Rm. 4H40. 7 a.m.

CONTINUING EDUCATION

DENTISTRY

Held in C 701 unless otherwise noted. Call x1101.

John Gurley Memorial Lecture—Oral Medicine. Holiday Inn Golden Gateway, SF. Sept. 21. (See inside calendar for details.)

Periodontal Prosthesis. Sept. 28.

Management of Craniomandibular (TMJ) Pain Patients. Sept. 29.

Periodontics. Oct. 6.

Endodontics. Monterey, CA. Oct. 12 & 13.

Nutrition. Oct. 20.

Mucosal Problems. Oct. 27.

MEDICINE

Call x4251, unless otherwise noted.

Office Procedures for the Practicing Physician. Holiday Inn Golden Gateway, SF. Sept. 17-21.

Recent Advances in Pulmonary & Critical Care Medicine. Hotel Meridien, SF. Sept. 20-22. Call x5208.

Allergy/Immunology for the Practicing Physician. Toland Hall. Oct. 4-6.

Intensive Residency in Occupational Medicine. Toland Hall. Oct. 8-19. Call x5208.

The Skin from A to Z. Cole Hall. Oct. 13-14.

Rheumatology, Allergy, & Clinical Immunology: An Advanced Course. Hotel Meridien, SF. Oct. 15-18. Call x5208.

Medical Mycology. HSW 300. Oct. 19-21.

RADIOLOGY

Call x5731.

Radiology Before & After PACS. Hilton Hotel, SF. Oct. 12.

Spine Update 1984. Fairmont Hotel. Oct. 18-20.

DEADLINE

Deadline for the next issue of *Today & Tomorrow,* covering the time period Sept. 29-Oct. 12, will be **Tuesday, Sept. 18, 11 a.m.** Please send your copy to Allen Balderson, News & Public Information Services, 532 Parnassus Ave., Rm. 300, x1541 or x2557.

Nobel laureate Luis Alvarez, one of the originators of the theory that an asteroid or comet impact caused the extinction of the dinosaurs, will speak on "Mass Extinctions and Their Extraterrestrial Causes" at the ninth annual Gordon Tomkins Memorial Lecture and Concert on Friday, September 28, at 3 p.m. in Cole Hall.

Preceding the lecture, world-renowned pianist Emmanuel Ax will perform.

In 1978 Alvarez joined a team of three others, including his geologist son, to study the great extinction that wiped out most of the life on earth 65 million years ago. Their findings led to the now widely accepted theory that a collision between the earth and a comet or asteroid threw large amounts of dust into the atmosphere, which led to the death of large numbers of species.

Professor emeritus of physics at UC-Berkeley and currently a senior scientist at the Lawrence Berkeley Laboratory (LBL), Alvarez won the Nobel Prize in Physics in 1968 for his work on subatomic particles. He has had a diverse career in science, initially studying cosmic rays before joining LBL in 1936. He contributed to the design of the largest cyclotron then in existence—LBL's 60-inch machine—and used it to make some of his most important discoveries in nuclear and atomic physics.

The Polish-born Ax has played with most major orchestras around the world, has won some of the most coveted prizes in the music world, and has recorded 11 albums for RCA, many achieving critical acclaim.

Tomkins, who died in 1975, was a professor and vice chair of the Department of Biochemistry and Biophysics, as well as an accomplished classical and jazz musician.

UCSF's proposal to develop shared campus-community housing, recreation, and parking on the Poly High School site is still before the SF Board of Education.

The Board of Education at its meeting on Tuesday, September 11, appointed a three-person committee to seriously consider UCSF's proposal and any other plans. Members of the community were present to support and also to oppose the UCSF plan.

In the meantime, Mayor Feinstein has announced that she is developing her own program for housing on the Poly site plus recreation at Kezar. In June the Board of Supervisors passed a resolution supporting the city's acquisition of the site for the development of affordable housing. A task force has been established by the Mayor's Office to plan this proposed development. At this writing, UCSF is not aware of the components of the city proposal, but looks forward to learning more about it.

Claude Levi-Strauss, one of social anthropology's most original and provocative thinkers, will present the 1984 Hitchcock Lecture. He will speak on "Mythical Thought and Social Life," on Tuesday, October 2, at 3:30 p.m. in HSW 300. The lecture is free and open to the public.

A member of the Laboratory of Social Anthropology, College of France, Levi-Strauss is best known for his monumental work *Mythologiques,* a four-volume series published from 1963 to 1971, in which he reviews and compares more than 800 American Indian myths. He argues that there is more internal structure to a myth than a mere narrative of episodes and says that myths, as a source of patterns, are ideal examples of "untamed thinking" directly relevant to the understanding of the structures of the mind.

As a Hitchcock Professor for the Academic Year 1984-85, Lévi-Strauss also will lecture at UC-Berkeley on Monday, September 24, on "The Birth of

DEVELOPMENT & TRAINING PROGRAMS

Open to all UCSF employees. Call x4032.

Management Skills Assessment Program. Dec. 3-7 & March 4-8.

SFGH

NEWS BRIEFS

(Hitchcock Lecture continued)

Historical Societies," and on "Mythical Thought and Social Life" on Wednesday, September 26. Both lectures will be held at 4 p.m. in Zellerbach Auditorium.

The Charles and Martha Hitchcock Professorship was instituted with a bequest by Dr. Charles M. Hitchcock in 1885. The Endowment Fund was enlarged in 1930 by his daughter, Lillie Hitchcock Coit, to extend the period of residence of the holder. Lévi-Strauss's lecture at UCSF is presented by the Graduate Division.

The formal dedication of the Reproductive Genetics Unit will be held on Wednesday, October 3, beginning at 2:30 p.m. in Toland Hall.

The dedication will be celebrated in conjunction with the second annual Foundation Day of the Obstetrics and Gynecology Research and Education Foundation. Chancellor Krevans and department chair Robert Jaffe will open the program which will include presentations by reproductive genetics faculty:

- "A Breakthrough in Prenatal Diagnosis of Genetic Defects." Mitchell S. Golbus, professor, ob/gyn & reproductive sciences and director, Prenatal Detection Program and Reproductive Genetics Unit. 3 p.m.
- "Window to the Fetus." Roy A. Filly, professor, radiology, ob/gyn & reproductive sciences; chief, ultrasound diagnostic section. 3:30 p.m.
- "Surgery on the Unborn." Michael R. Harrison, associate professor, surgery; co-director, Fetal Treatment Program. 4 p.m.
- "Research Directions in Prenatal Diagnosis." Mitchell S. Golbus. 4:30 p.m.

Leonard Yerkes, chair of the development committee of the Ob/Gyn Research and Education Foundation will close the program.

Tours of the new facility and a wine and cheese reception will follow on the second floor of the old University Hospital building.

The Reproductive Genetics Unit, part of the Department of Ob/Gyn and Reproductive Sciences since 1971, is internationally recognized for its pioneering work in the development of prenatal diagnostic techniques and fetal intervention. The new 2,800-square-foot facility will house the chromosome laboratory, research lab and a new facility for DNA work.

A new Occupational and Environmental Medicine Clinic has opened on the fourth floor of the Ambulatory Care Center, according to Robert Harrison, MD, director. The clinic has been set up to meet the increased interest and concerns of both industry and workers over occupational health issues.

The staff will evaluate workers with occupational illness and injuries, consult with area physicians on environmental problems and develop occupational health surveillance programs for industry and labor.

Harrison, who also collaborates on research projects at UC-Berkeley, was trained in the UCSF Division of Occupational and Environmental Medicine.

Appointments or inquiries can be made by calling x1841.

The next campus blood drive is scheduled for Monday, October 8. Blood donation sites are the main lounge of Millberry Union from 8 a.m. to 3 p.m., and the mezzanine level of the School of Nursing building from 11 a.m. to 5:30 p.m. Donors are asked to bring personal ID. Appointments are not necessary but can be made in advance by calling x4013.

Two $35 gift certificates for the Washington Square Bar & Grill again will be raffled after the drive. The gift certificates are donated by the restaurant and the Associated Students of UCSF. To be eligible for the drawing, donors should place their receipts in the boxes provided. Nancy Granzella from the School of Pharmacy and Conley Lacey from Ob/Gyn were winners of the April 30 blood drive raffle.

The UCSF Dental Alumni Association will stage a contest among the School of Dentistry students, with cash awards going to the classes that donate the most blood during the October 8 drive.

Campus blood drives are sponsored by the Irwin Memorial Blood Bank of the San Francisco Medical Society, and coordinated by the Campus Tours/Speakers Bureau. For further information call x4394.

Millberry Union non-student membership fees will go up 15 percent beginning with the fall quarter. The increase reflects the present rate of inflation, a range adjustment in staff salaries of approximately 9 percent and substantial repair and maintenance expenses, according to manager Al Minvielle. The new rates will be: UCSF staff, faculty and alumni $42; community $60; spouses $42; children $21. For further information call x2671.

Mass spectrometry, a field undergoing an exciting renaissance as an important research tool in molecular biology and genetic engineering, was the subject of a four-day international symposium held in San Francisco the second week of September.

Sponsored by the School of Pharmacy, the "International Symposium on Mass Spectrometry in the Health and Life Sciences" coincided with the official dedication of UCSF's Mass Spectrometry Facility in the basement of the Clinical Sciences building.

The symposium, chaired by Neal Castagnoli, Jr., PhD, professor of pharmaceutical chemistry, brought together doctors, engineers and scientists from around the world with discussions ranging from applications of mass spectrometry in medical diagnosis to techniques for analyzing ever larger proteins.

Mass spectrometry is a means of measuring the mass of atoms and molecules, thereby identifying them and their basic constituents. According to Alma Burlingame, PhD, director of UCSF's facility, there has been a revolution in the last five years in the field, making it possible to look at larger and larger molecules, in particular biologically important proteins and other informational macromolecules such as DNA.

Nominations now are being accepted for the 28th Faculty Research Lecturer, the foremost recognition for scientific achievement awarded by the UCSF campus.

Nominations can be made by any Academic Senate member by submitting the following material by Wednesday, September 26, to the Committee on Research, Academic Senate Office, Room U 100H:

- a one-page summary of the most outstanding achievements of the candidate's scientific career,
- curriculum vitae,
- no more than four representative reprints of the candidate's publications.

Final selection of this year's lecturer will be announced in October.

The Community Health Education Program (CHEP), now entering its eighth year, needs volunteers. CHEP is a University-sponsored outreach program in which UCSF faculty, staff and students give health education presentations to senior citizens and other groups throughout San Francisco.

CHEP presentations last about one hour and include 15 to 20 minutes of lecture followed by 40 to 45 minutes of discussion. CHEP topics vary depending on the expertise of the presenter.

The Office of Public Service Programs is sponsoring a reception on Wednesday, September 19, from 4 to 6 p.m. at the Faculty/Alumni House to acquaint new volunteers with the program and to thank current CHEP health educators. For further information call David Bracker at x3206.

Ninety percent—78 out of 87—of the UCSF dentistry graduates who took the California State Board in June passed, according to Dean John C. Greene. This performance represents continuing and major improvement in the school's academic programs and is a compliment to the dedicated effort of the faculty and energy and talents of the student body, Greene declared.

Some $250,000 in fellowships plus tuition and fees have been awarded to nine first-year and five second-year Graduate Division students:

- The Earle C. Anthony/Graduate Dean's Fellowship for $8,100 per year to first-year student Laura D. Lewis to study endocrinology.
- Three-year National Science Foundation Fellowships, also for $8,100 per year, to first-year students John D. Altman, pharmaceutical chemistry; and Barbara Chapman, neurosciences; and to second-year students Gerard L. A. Apodaca, experimental pathology; Leonard Simmons, III, biochemistry; Candace S. Waddell, genetics; Ellen Y. Wu, pharmacology; and Aline McKenzie, neurosciences.
- One-year Graduate Division Fellowships for $7,800 to first-year students Cynthia A. Keleher, endocrinology; Peter Wei-Der Li, medical information science; Laurie McPherson, pharmacology; Karla M. Neugebauer, neurosciences; Jeep-Kung G. So, bioengineering; and Jeffrey P. Woodard, speech and hearing science.

The latest issue of *Mobius,* "Risk and the Health of the Public" (Vol. 4, No. 3), is based on a symposium held in November of last year on risk assessment and health hazard appraisal.

Sponsored by UCSF and the Health Officers Association of California, the meetings brought together a mixture of senior public health officers, clinicians and university investigators to examine the research base upon which public health policy and patient care decisions are made.

Featuring guest editor Philip R. Lee, MD, director of the UCSF Institute for Health Policy Studies, this special issue of *Mobius* has articles ranging from the epidemiology of cancer to preventing teenage pregnancy, all written by UC faculty, many from UCSF: Peter B. Budetti, MD, JD; Paul W. Newacheck, MPP; M. Faith Mitchell, PhD; A. Eugene Washington, MD; Carol C. Korenbrot, PhD; Warren S. Browner, MD, MPH; Stephen B. Hulley, MD, MPH; Nicholas L. Petrakis, MD; Susan Wilner, DSc; and Steven R. Cummings, MD.

Mobius—the journal of the Alliance for Continuing Medical Education—is sponsored by the Institute for Health Policy Studies and published quarterly by the UC Press. Single issues may be purchased for $5 from the *Mobius* Office, Room 565 CED, UCSF. Make checks payable to UC Regents. For further information call x3801.

HONORS & AWARDS

Sandra J. Weiss, associate dean, School of Nursing; associate professor, mental health & community nursing: Elected chair of the board, American Heart Association. **Dorothee Perloff,** associate clinical professor, medicine, elected president-elect; **Jesse Davis,** assistant clinical professor, medicine, vice president of research; and **Carolyn Somelofski,** clinical specialist, cardiovascular nursing, vice president of community programs.

Dennis Sherraden, associate clinical professor, restorative dentistry, School of Dentistry: Elected vice president of the California Section of the American College of Prosthodontics.

Diana B. Petitti, assistant professor, family & community medicine: Invited to serve as a member of the Health Care Technology Study Section of the National Center for Health Services Research.

Pablo Stewart, third-year psychiatry resident: Awarded the Mead Johnson Fellowship of the American Psychiatric Association for 1984-85.

Michael F. Roizen, associate professor, anesthesia, pharmacy & medicine: Elected to the board of directors, Society of Cardiovascular Anesthesiologists and chair of their research committee; elected to scientific advisory board, Association of University Anesthesiologists; appointed to committee on circulation, American Society of Anesthesiologists; and to the medical advisory council, US Squash Racquets Association.

Lisa Dunkel, LPPI librarian: Elected chair of the Mental Health Librarians Section, Medical Library Association, 1984-86.

Diane W. Scott, postdoctoral fellow, oncology nursing, Robert Wood Johnson Foundation: Awarded first prize in the patient teaching category, 1984 American Journal of Nursing Media Festival, for the slide program "The Chemotherapy Experience" and for the "Progressive Relaxation Audiotape."

Norman Kretchmer, professor, pediatrics & obstetrics; director, Koret Center for Human Nutrition, SFGH: Winner of the International Prize for Modern Nutrition from the Central Association of Swiss Milk Producers for his work in gastrointestinal development and its impact on nutrition.

Susan Gortner, professor & associate dean for research, School of Nursing: Appointed to the Cabinet on Nursing Research of the American Nurses Association.

Douglas L. Schmucker, associate professor, anatomy; assistant chair, cell biology & aging, VAMC: Received an $18,500 research grant from American Federation for Aging Research (AFAR) for "Effects of Aging on the Liver Mixed Function Oxidase System."

Mary Kane, UCSF volunteer: Received the highest award from the UCSF Volunteer Services for donating 7,000 hours over the last 13 years.

PUBLICATIONS

Albert A. Moss, professor, medicine; **Gordon Gamsu,** professor, radiology; **Harry K. Genant,** professor, radiology, medicine & orthosurgery: Co-editors of *Computed Tomography of the Body* (W.B. Saunders, Phila., 1983).

APPOINTMENTS

Mary Ann Beaumont: Appointed director of Development Services & assistant vice president for the UCSF Foundation. She is currently director of University Relations Services & Systems at Marquette University in Milwaukee and will assume her new duties in November.

Kathleen Brown: Appointed acting director, physical & occupational therapy, Hospitals and Clinics. She replaces **Rita Arriaga** who has been with UCSF for 10 years, serving as director for the past 5 years. Arriaga leaves UCSF to join a private practice in San Francisco.

A slide/lecture history of the San Francisco Art Museums will be presented by Mrs. Pat (Meyer) Schindler, a docent of the Fine Arts Museum, at the Faculty Wives Meeting on Wednesday, October 3, at 10:30 a.m. at the Faculty/Alumni House. Luncheon will follow the presentation. For further information contact Marjorie Campagna-Pinto at 921-6646.

The Friends of Langley Porter Psychiatric Institute will hold its annual meeting and luncheon on Thursday, October 4, at 11:30 a.m. at the Faculty/Alumni House.

Guest speaker Enoch Callaway, professor of psychiatry, will present "Bears and Berries: A Possible Link Between Molecules, Moods and What We See." Members of the Friends of LPPI wishing to attend should call x77-397 by Monday, September 24.
